CHALLENGE

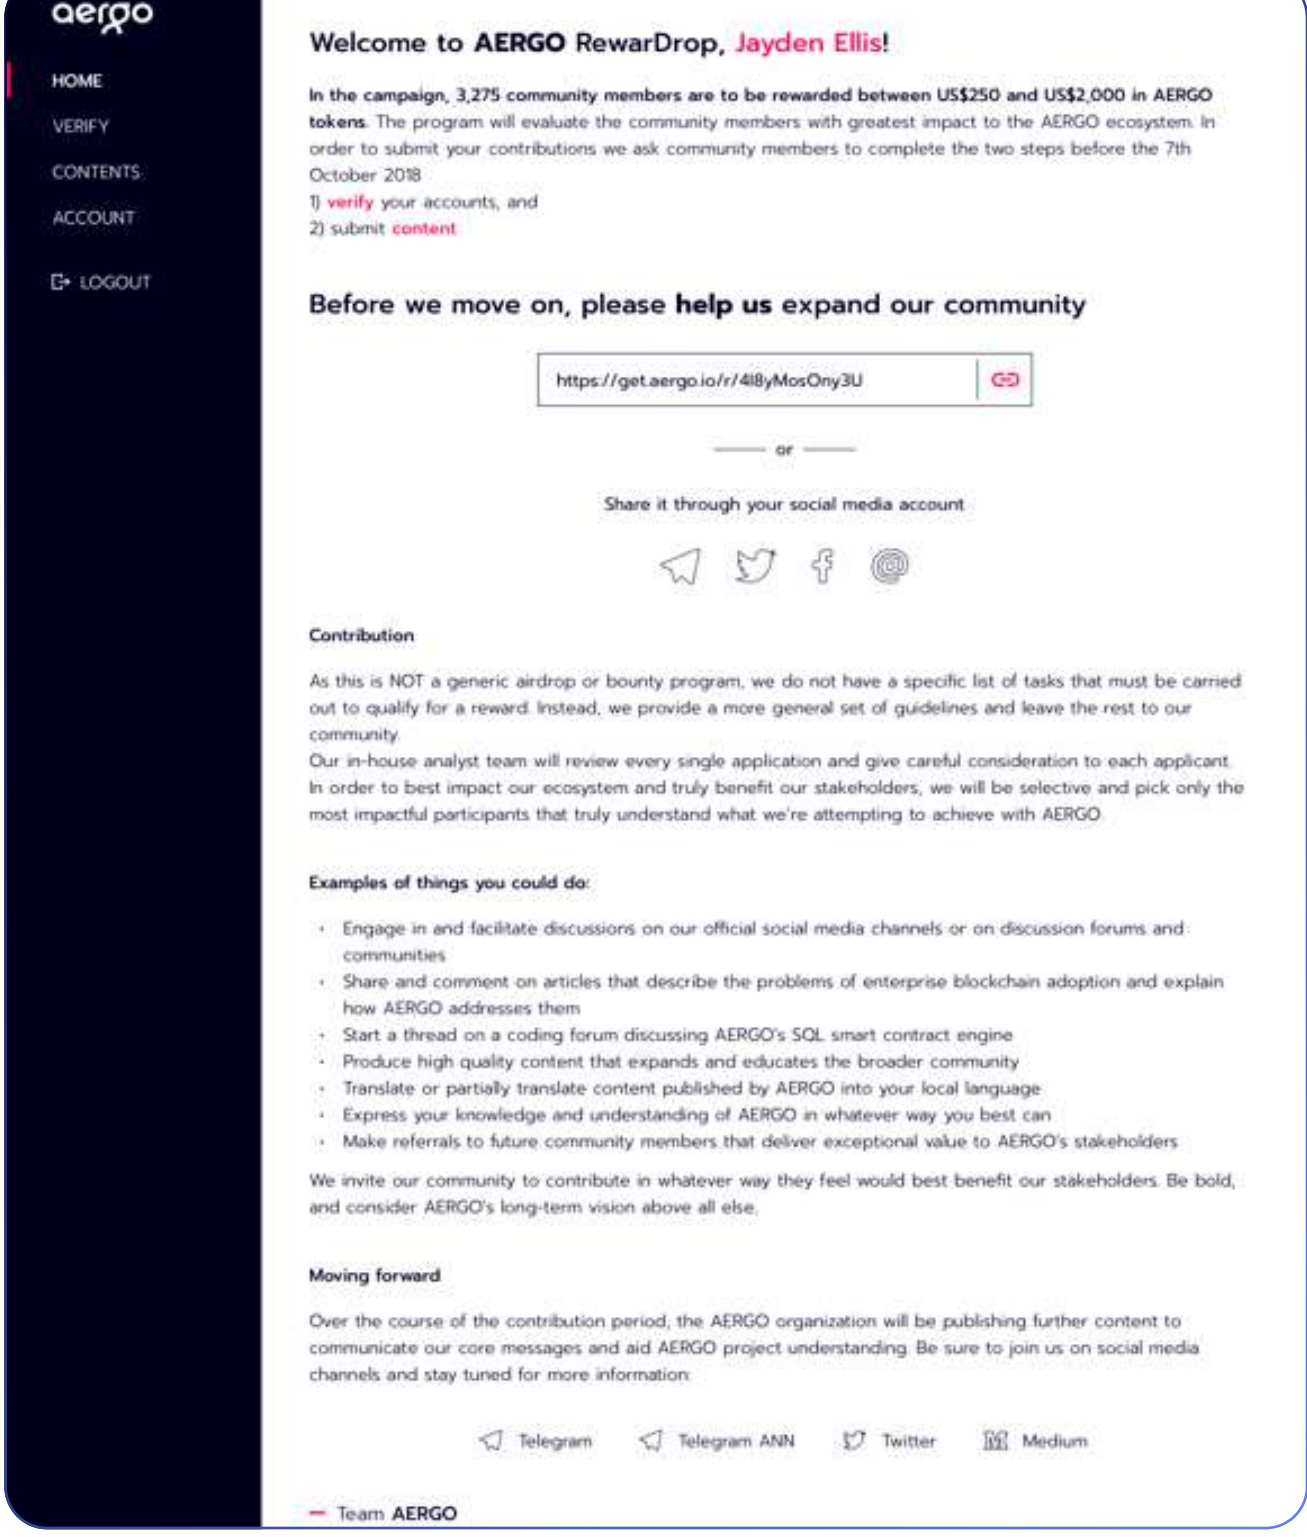

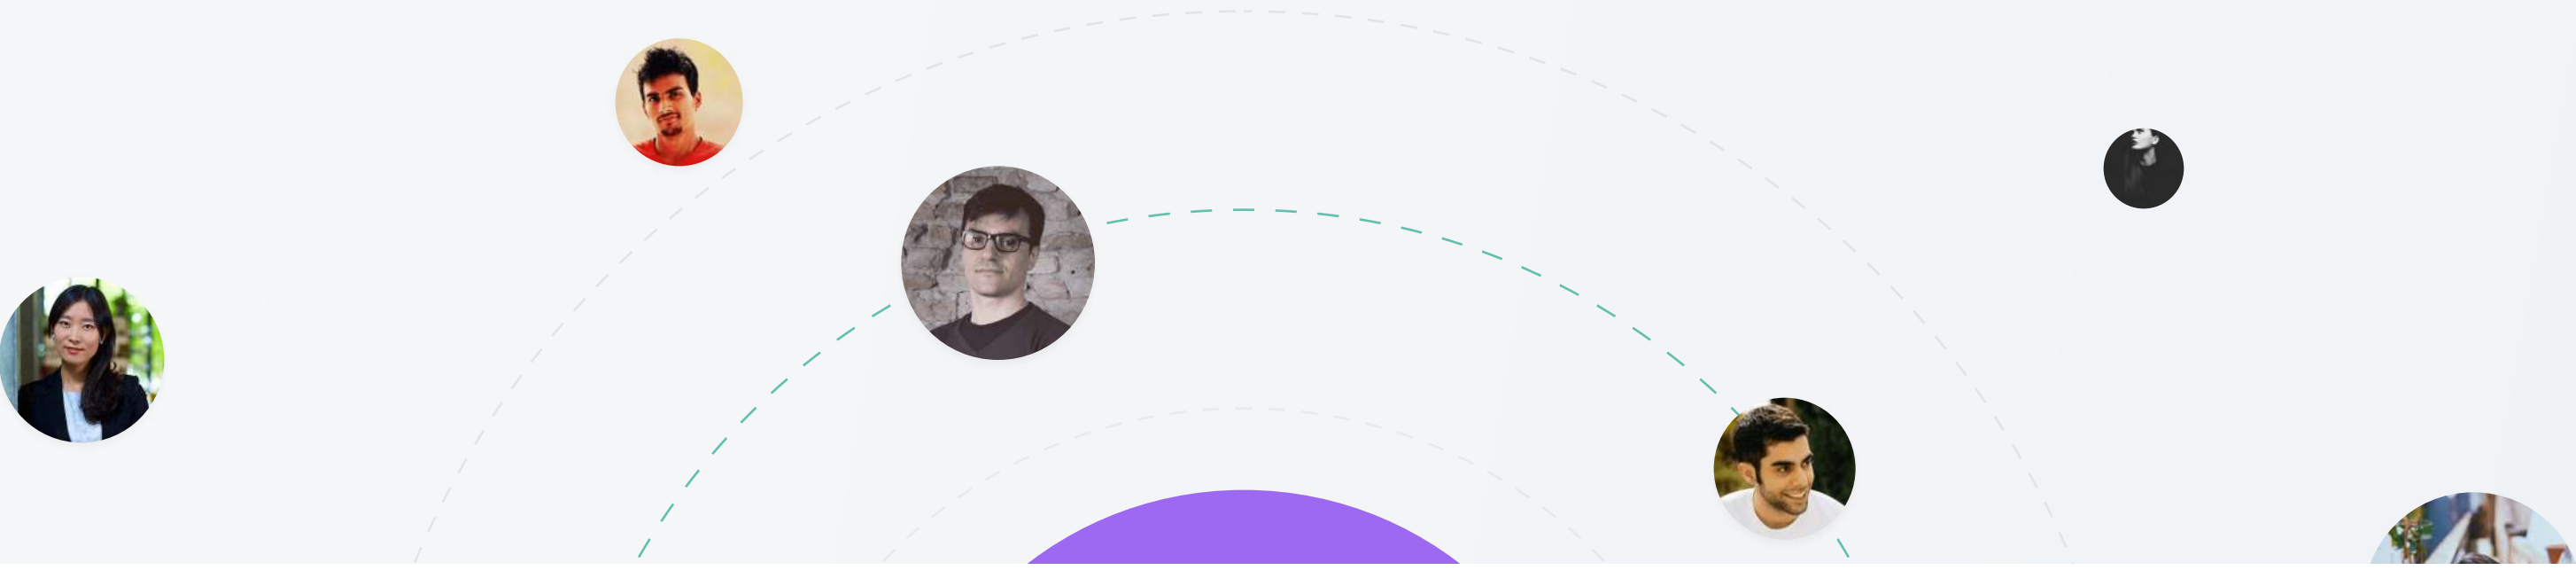

GetAergo tool was developed to help Aergo team evaluate the Aergo community members with greatest impact to the AERGO ecosystem.

GetAergo is a powerful tool that helped Aergo team make a fair & effective decision on who of the community members can be rewarded.

Client/Target audience

Who are interested in the field of cryptocurrency and fintech.

Important features

The tool we created for Aergo team did its job successfully before Aergo ICO. We were happy to make a contribution to the start of this innovative, effective new Blockchain-based system.

Product overview

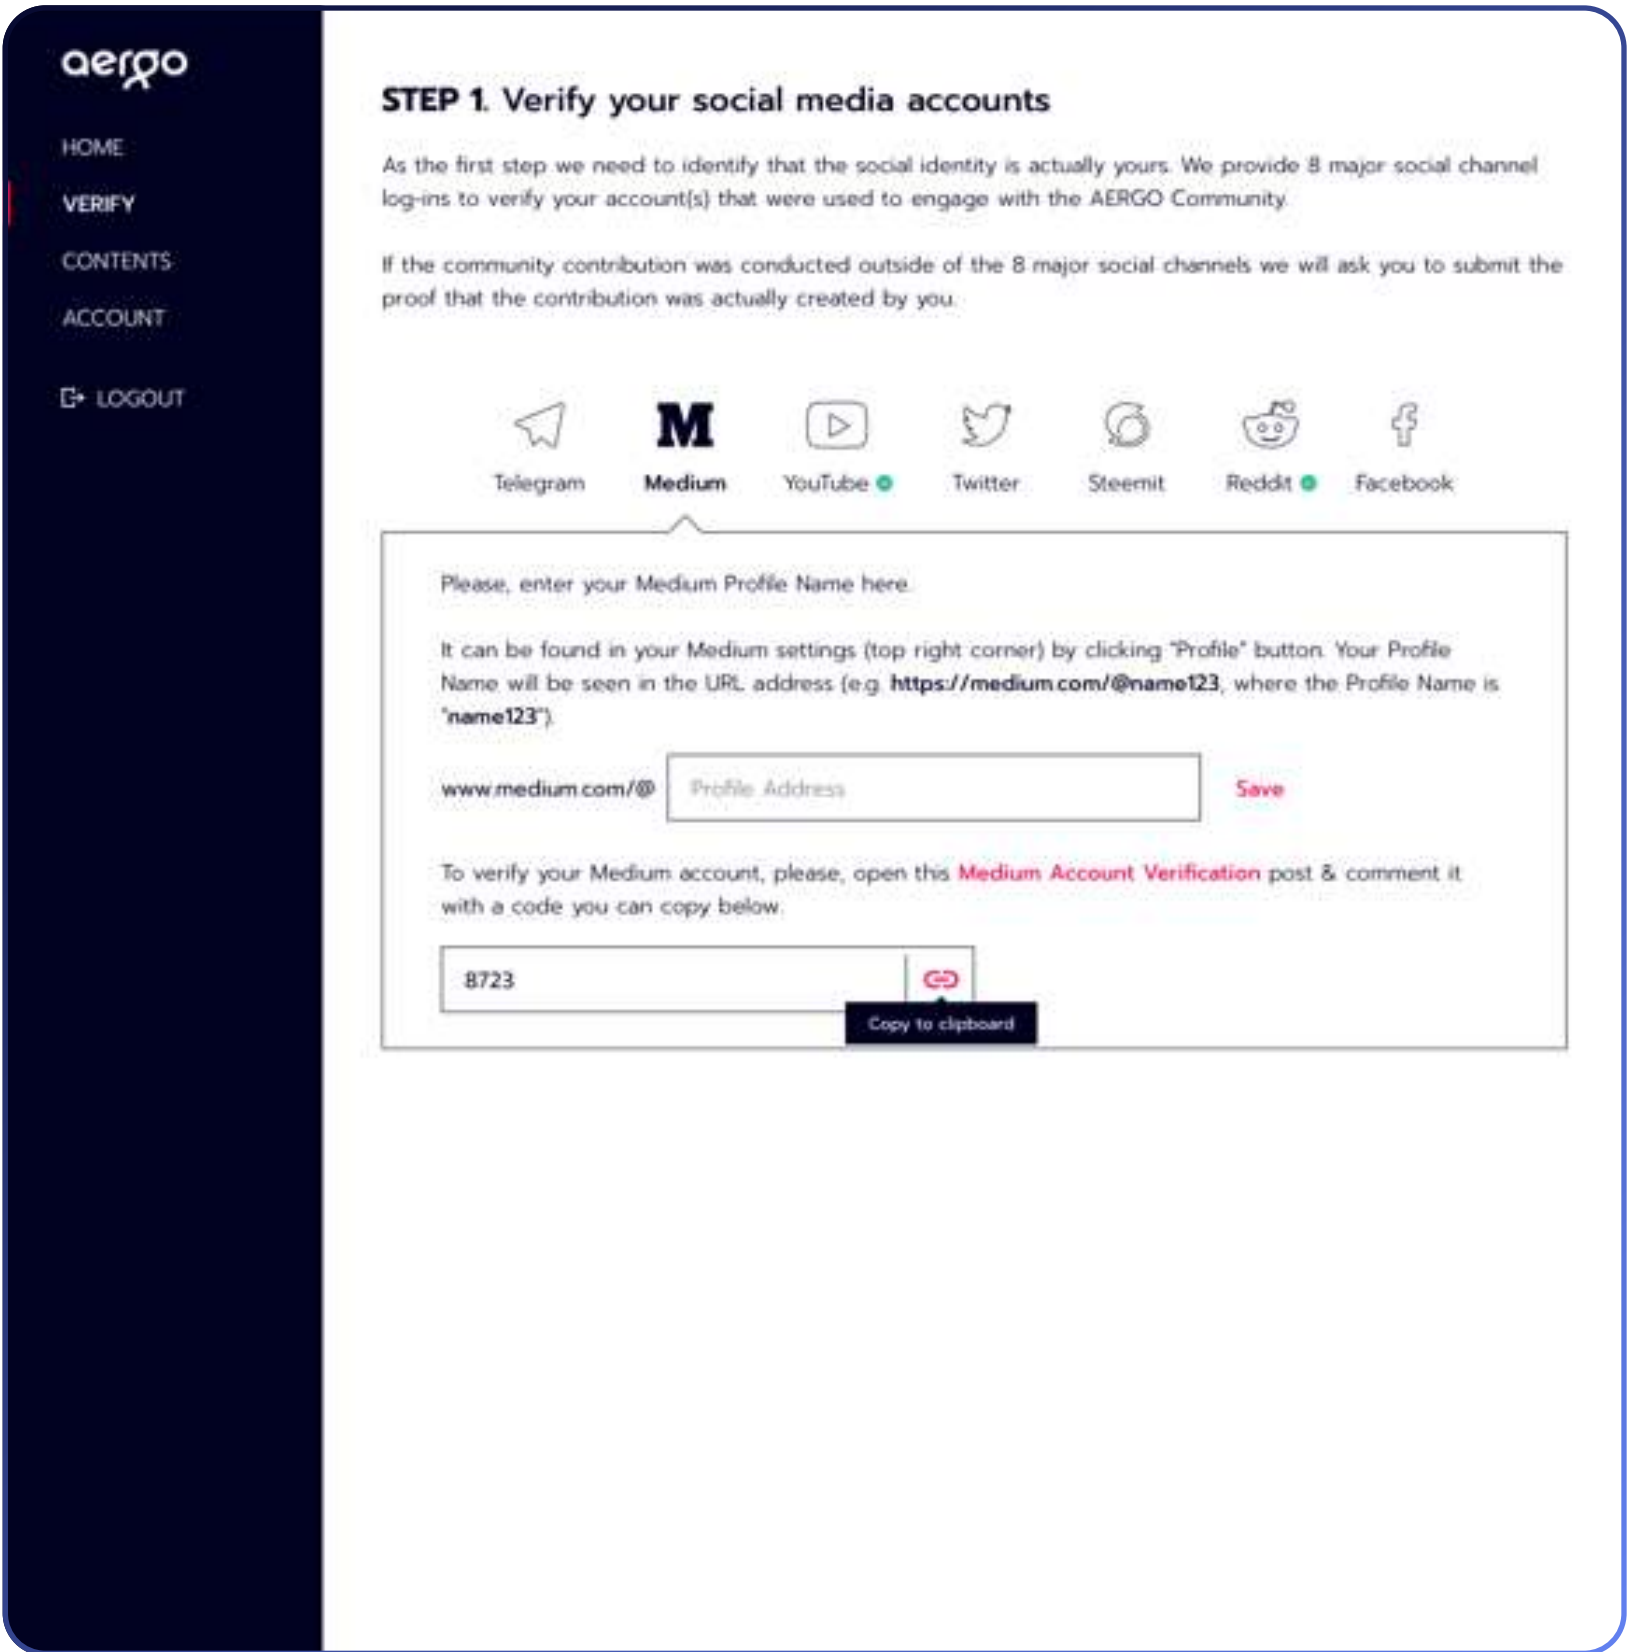

GetAergo tool helped Aergo community members to:

Verify their Telegram, Medium, Twitter, YouTube, Steemit, Reddit & Facebook accounts.

Create some content to influence AERGO ecosystem using social network accounts or outside of the major social channels.

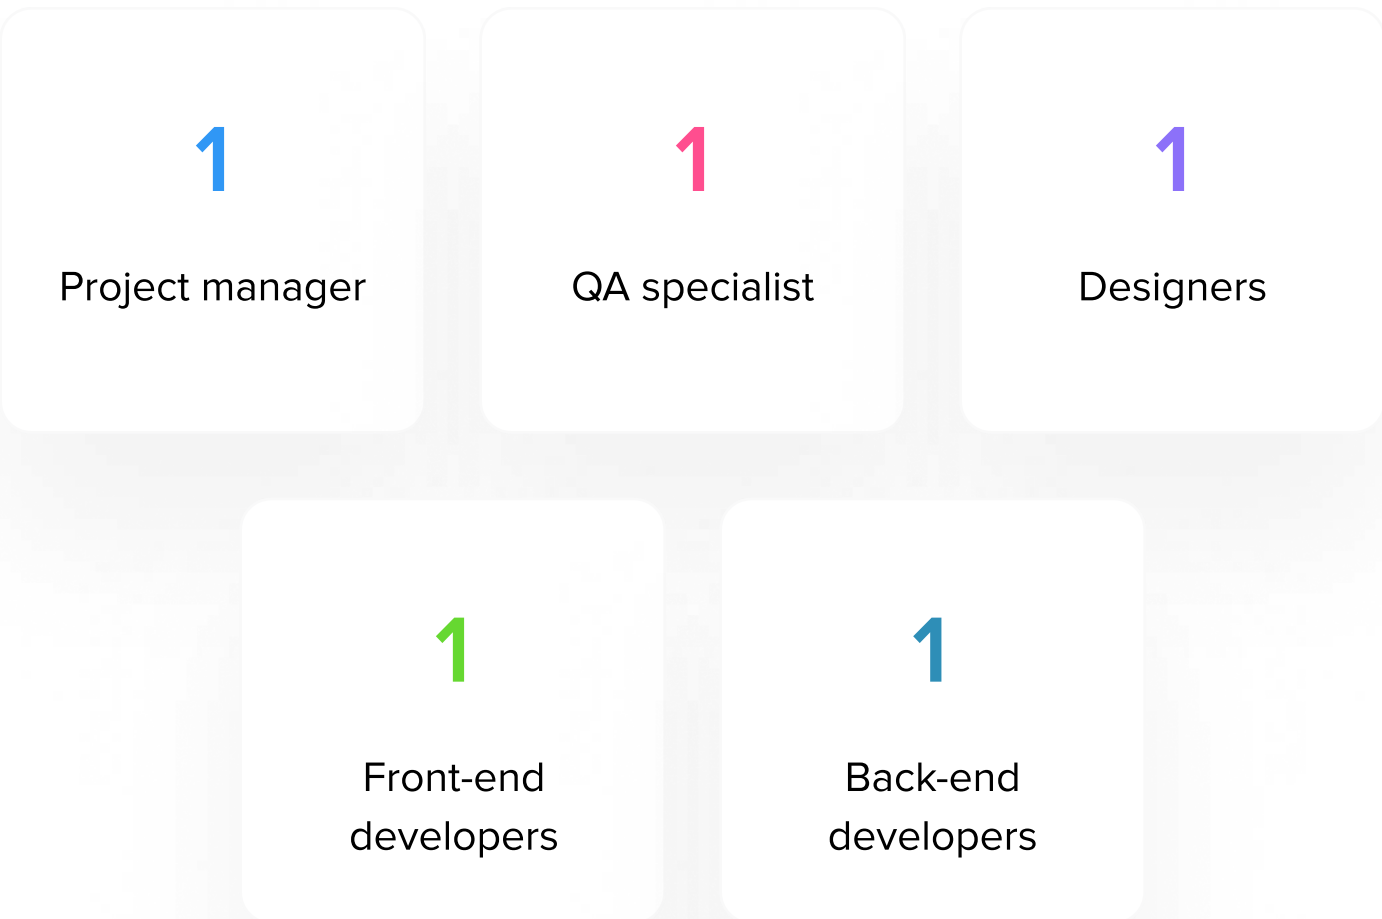

Submit the proof that the contribution was actually created by certain Aergo community member.

The engine of the system collected, structured & analyzed all the information of community members in automatic mode. After that it became easy for the Aergo Team managers to make their final decisions.

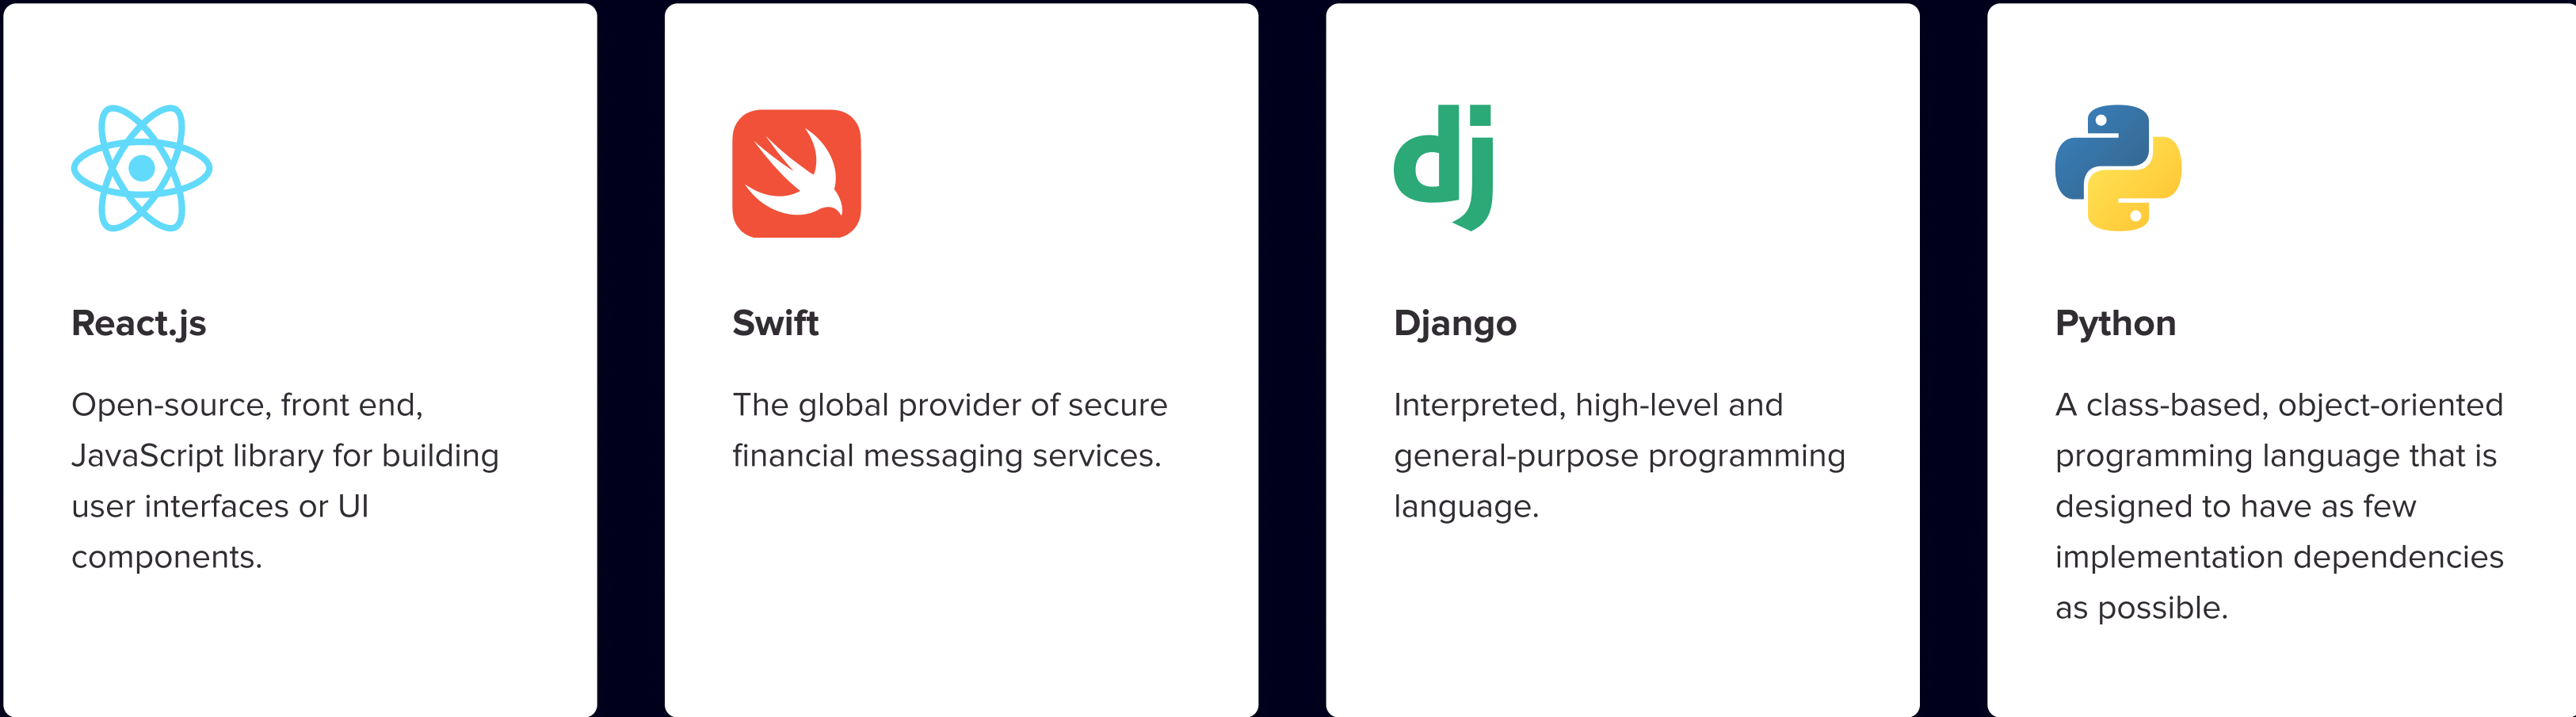

Our development team

Thanks to the efficient and well-coordinated work of a small team, the development of telegram bots saves the client's resources significantly.

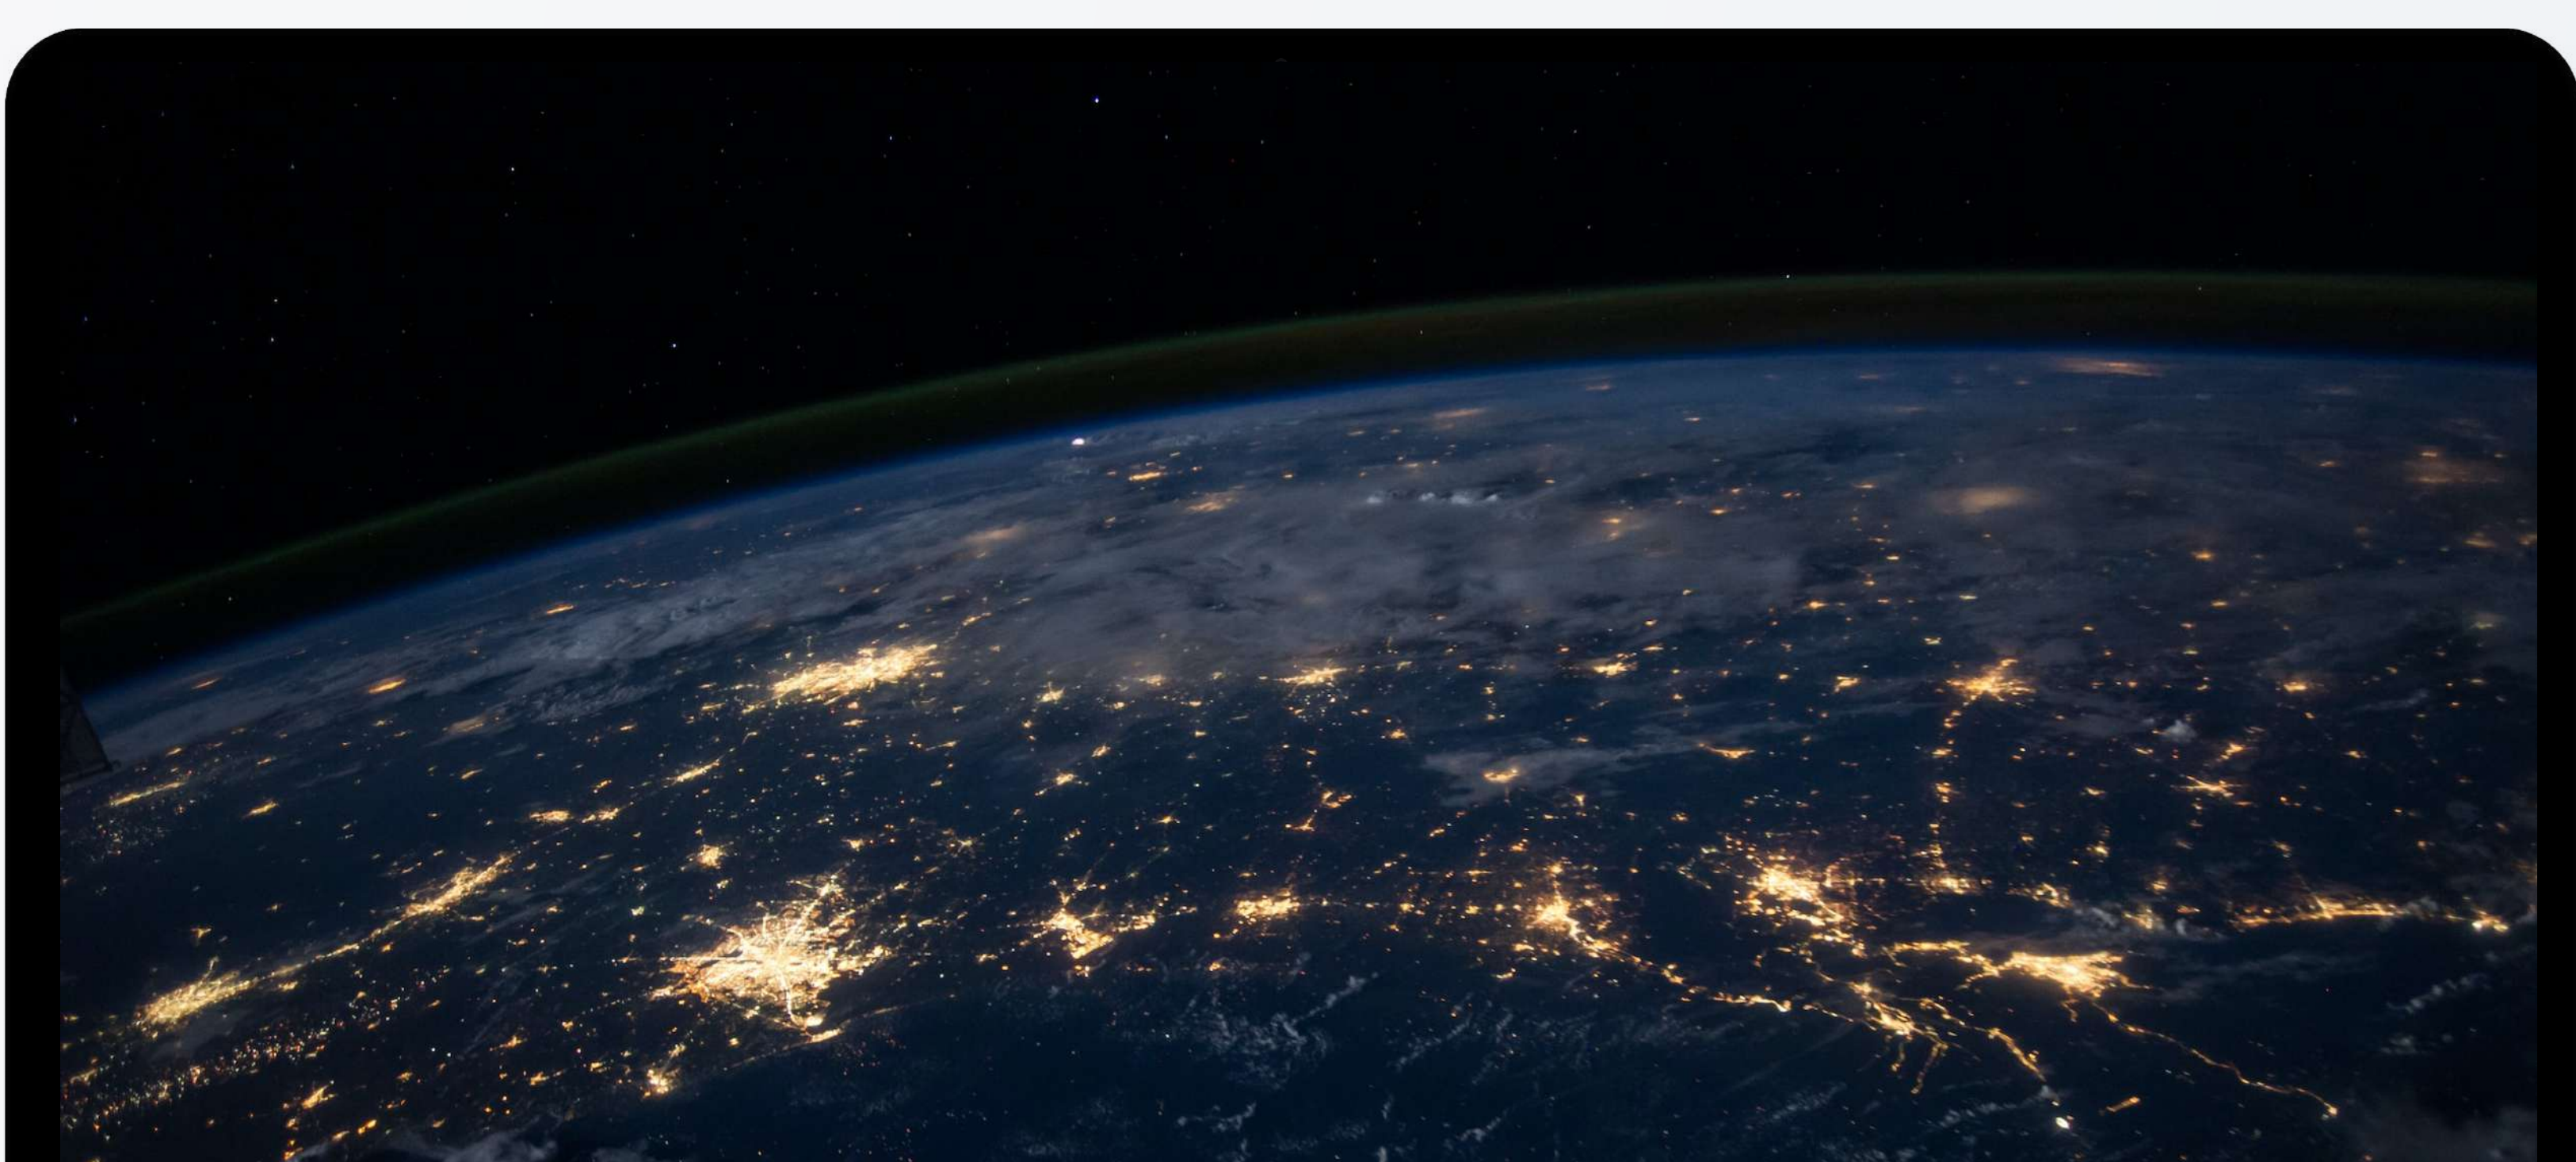

Our approach

Solution overview

Owlab helped Aergo to create an innovative commercial experience with automatic analysis of competitor prices and the ability to respond to every client interaction point-by-point.

Thanks for watching!
