

HODL WEKK

News portal

Development service
Web Service

Business niche
Social media

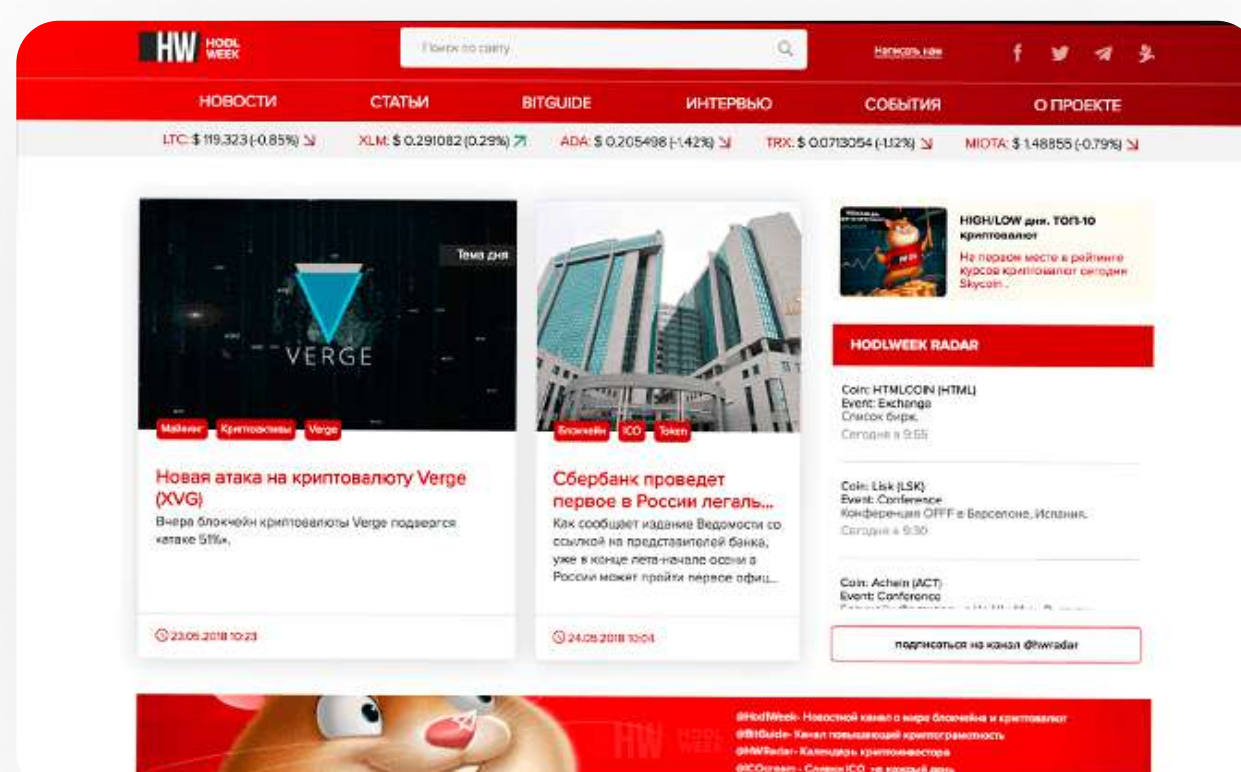

Time spent on the project
500 Hours

Technologies we used
Python, Django, React.js, Custom CMS

CHALLENGE

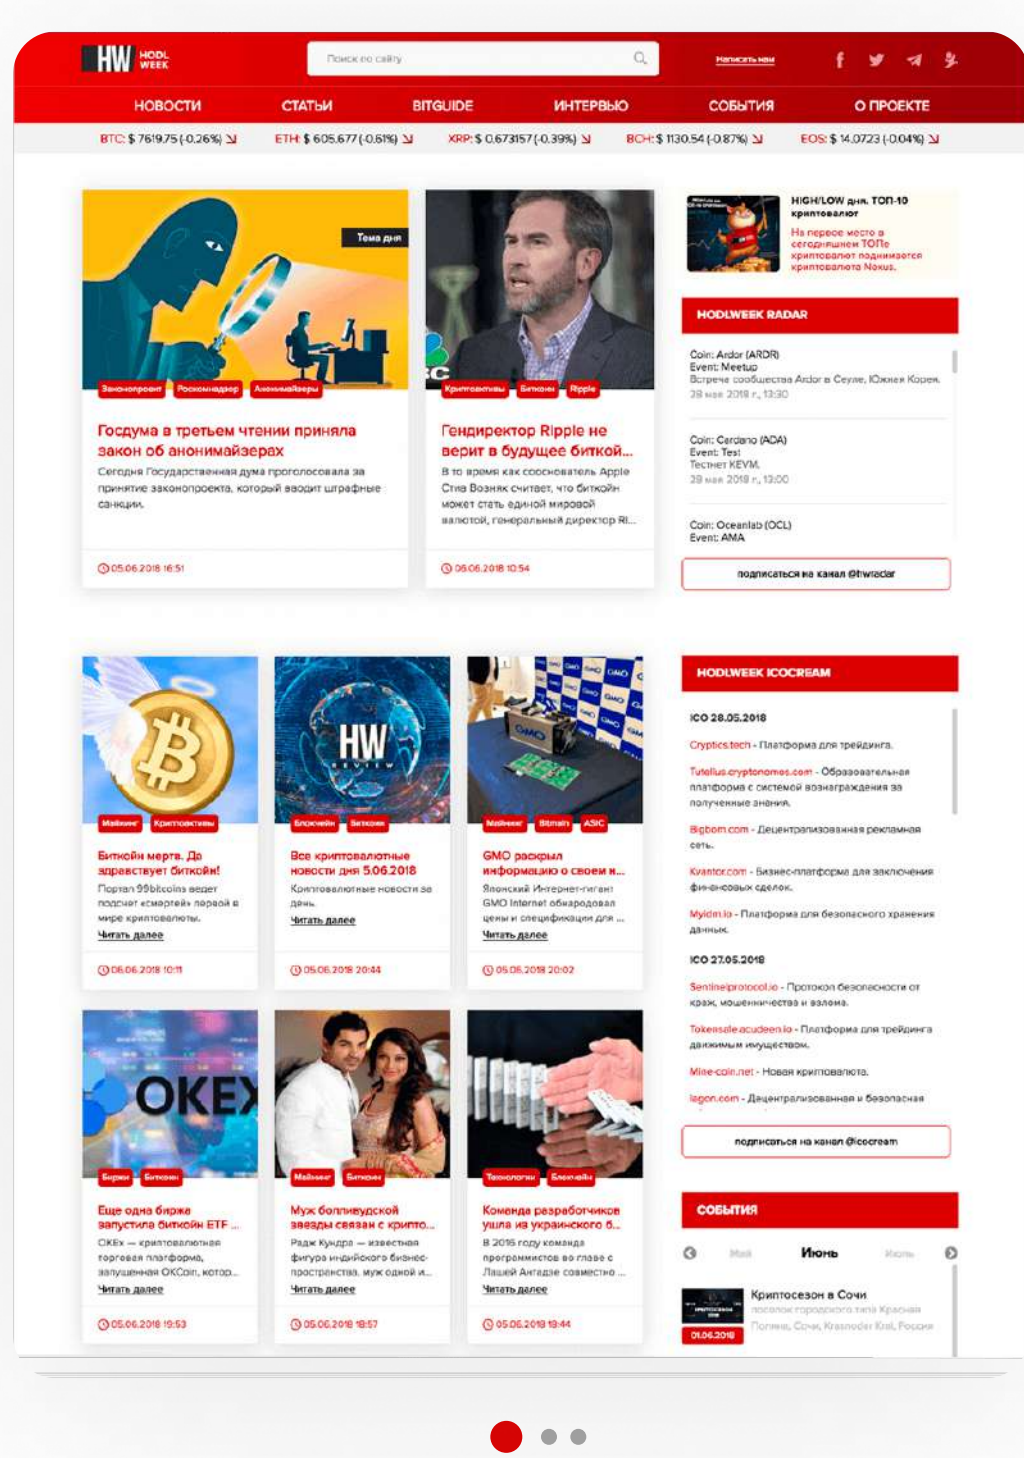

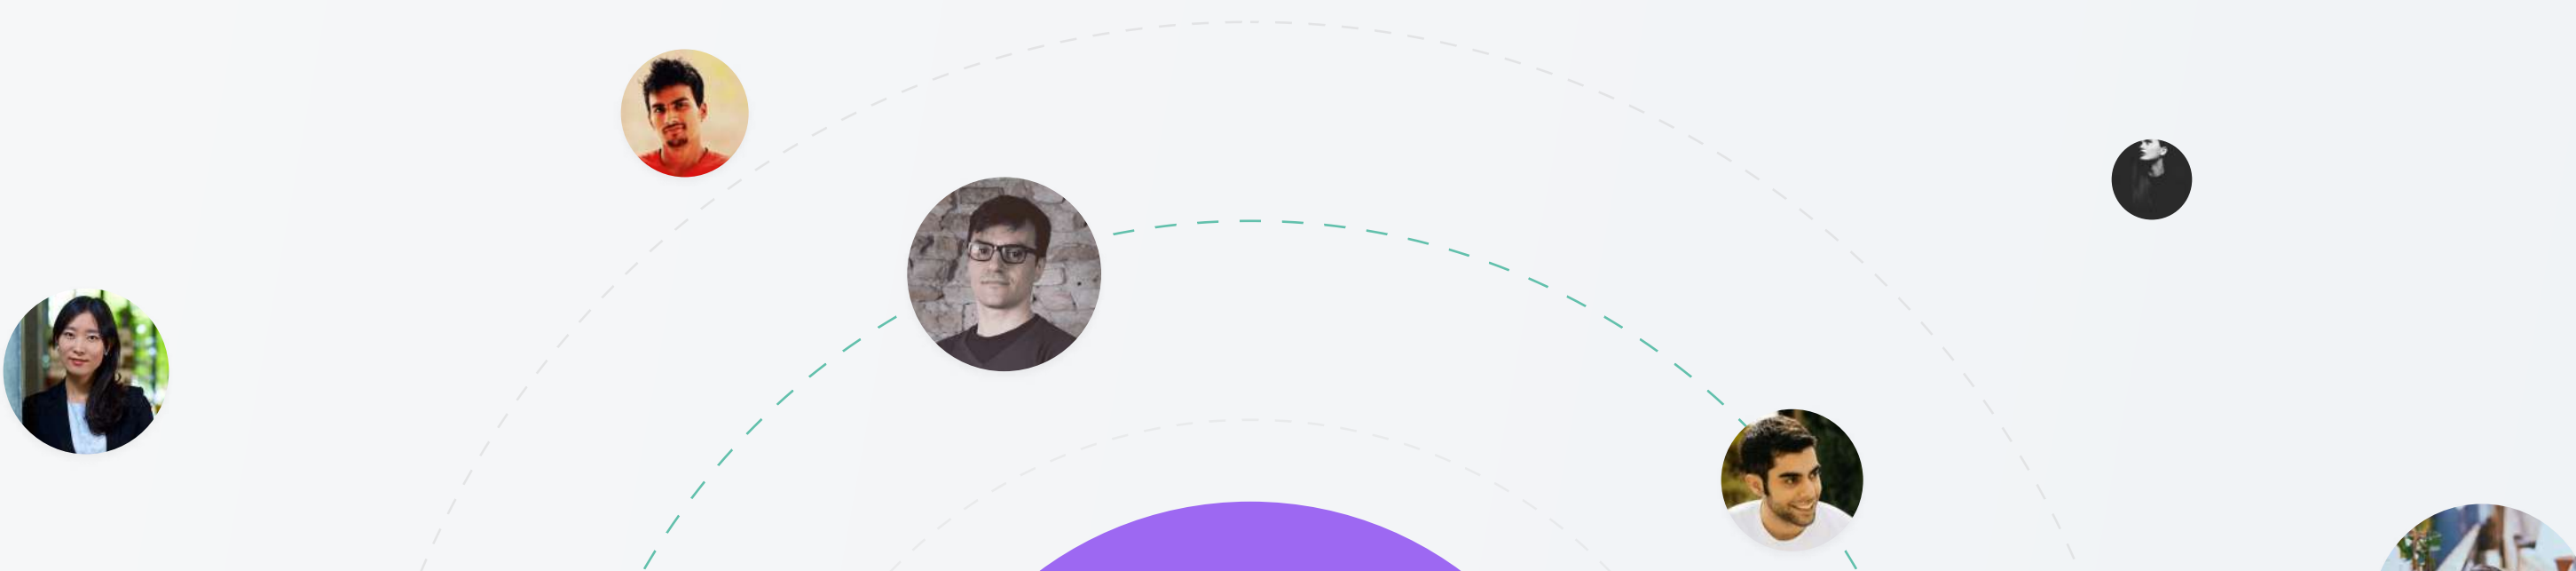

HodlWeek is the news portal about cryptocurrencies and blockchain technology in general.

Our website purpose is to make the world of blockchain and cryptocurrencies more understandable for the regular person™ © Co-founder HodlWeek

Client/Target audience

Who are interested in the field of cryptocurrency and news about crypto

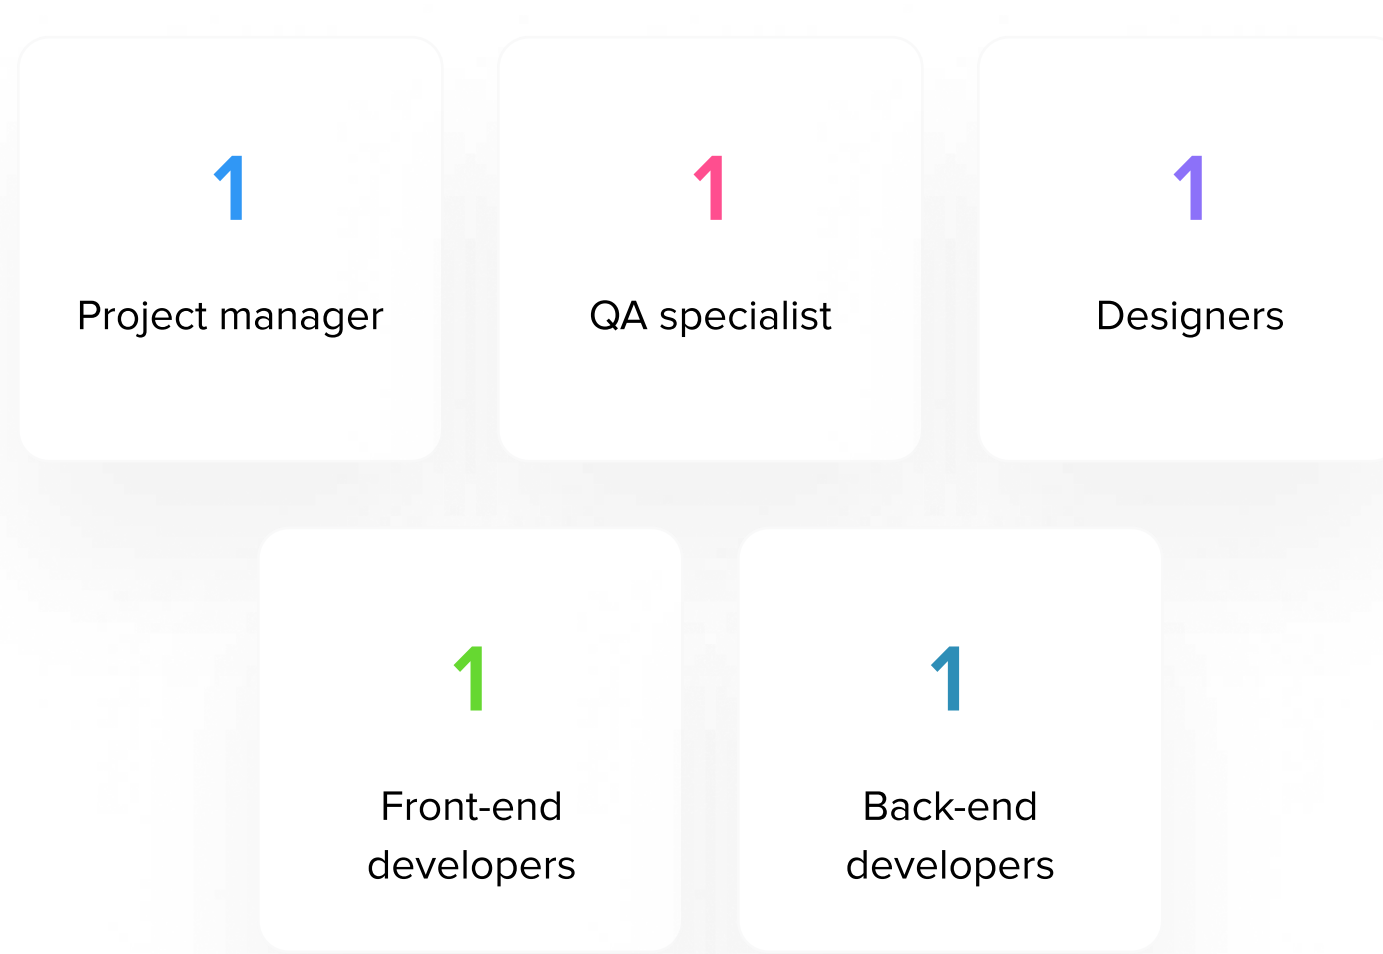

Product overview

Owlab team used the latest technologies to create fast and stable news portal. It was great experience of cooperation with the client and we will be glad to work with HodlWeek team in the future.

Our development team

Thanks to the efficient and well-coordinated work of a small team, the development of telegram bots saves the client's resources significantly.

Our approach

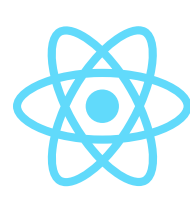

Django

Interpreted, high-level and general-purpose programming language.

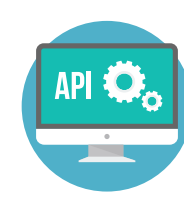

Python

A class-based, object-oriented programming language that is designed to have as few implementation dependencies as possible.

React.js

Open-source, front end, JavaScript library for building user interfaces or UI components.

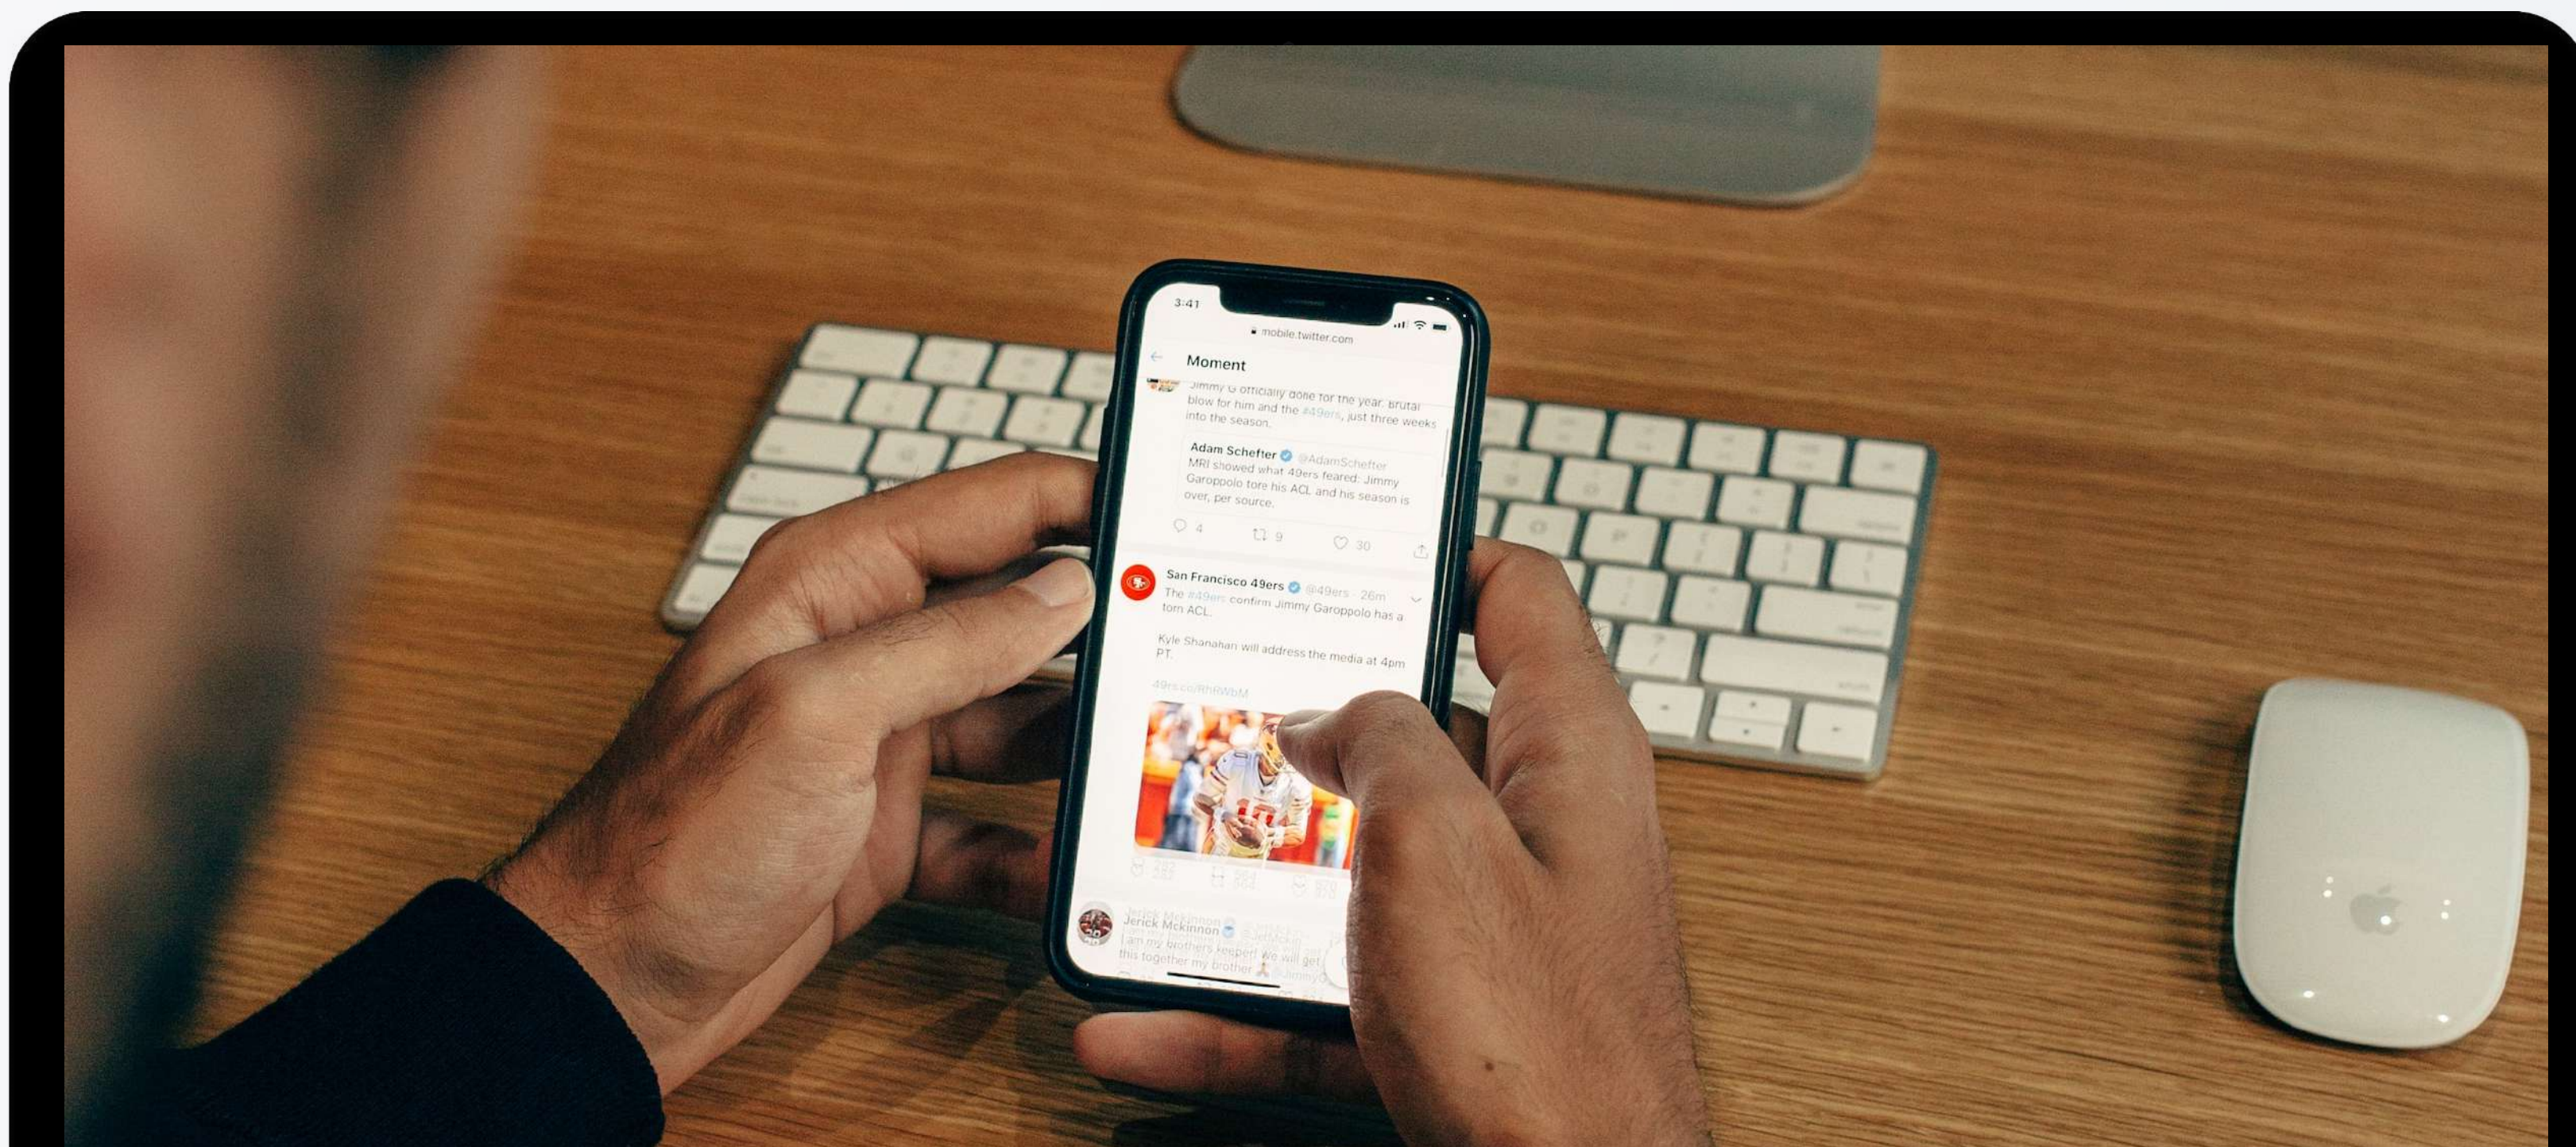

REST Api

This is an architectural style for an application that uses HTTP requests to access and use data

Solution overview

Owlab created a unique news portal about cryptocurrency and blockchain technologies. Good optimization and impeccable design create the most positive user experience.
