Application for patient condition monitoring and medication dosage calculation.

Development service
Web Service

Business niche
Sales

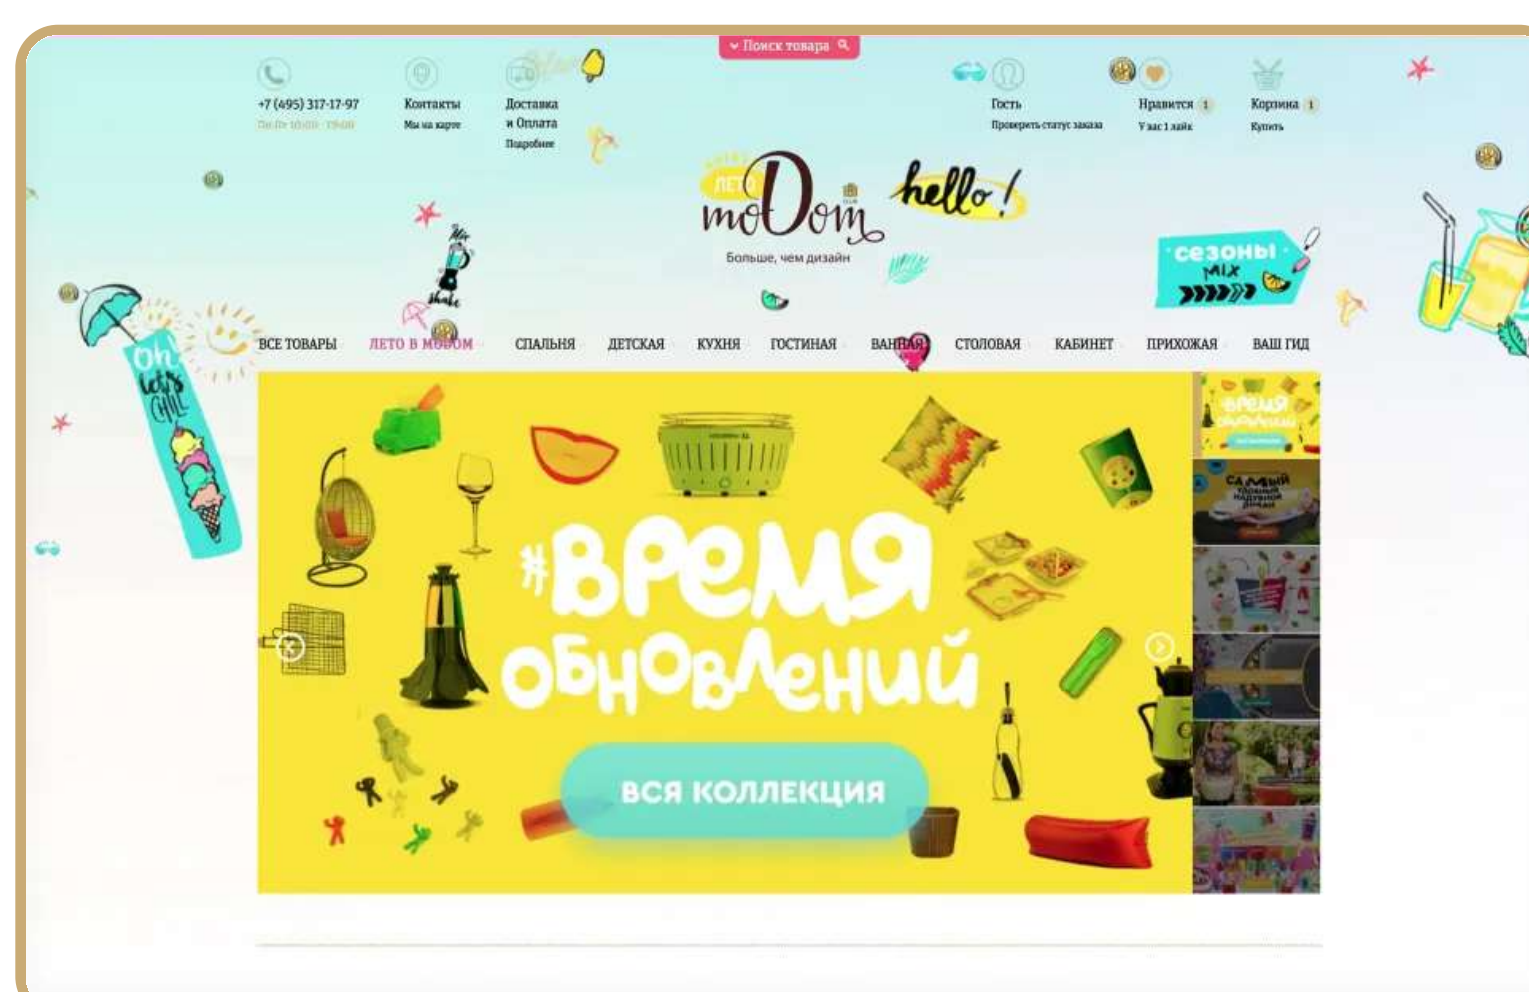

Time spent on the project
3000h

Technologies we used
Python, Django, React Js, Redux, Jquery, Less, PostgreSQL

CHALLENGE

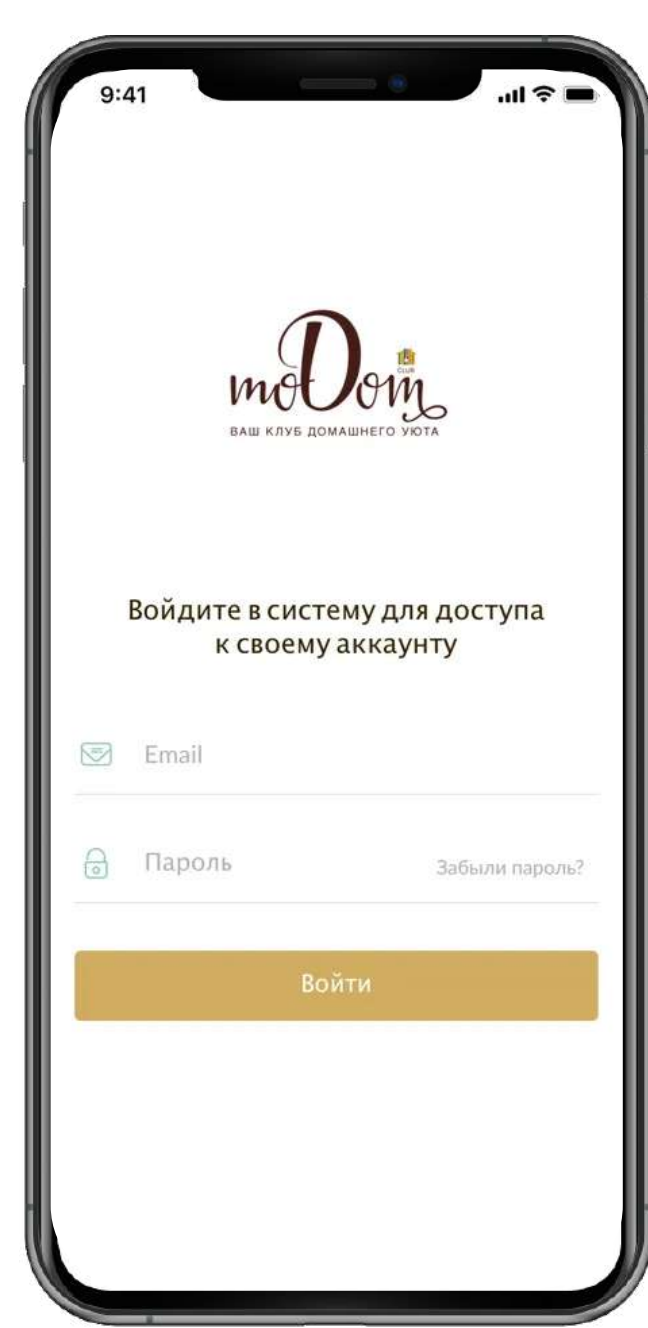

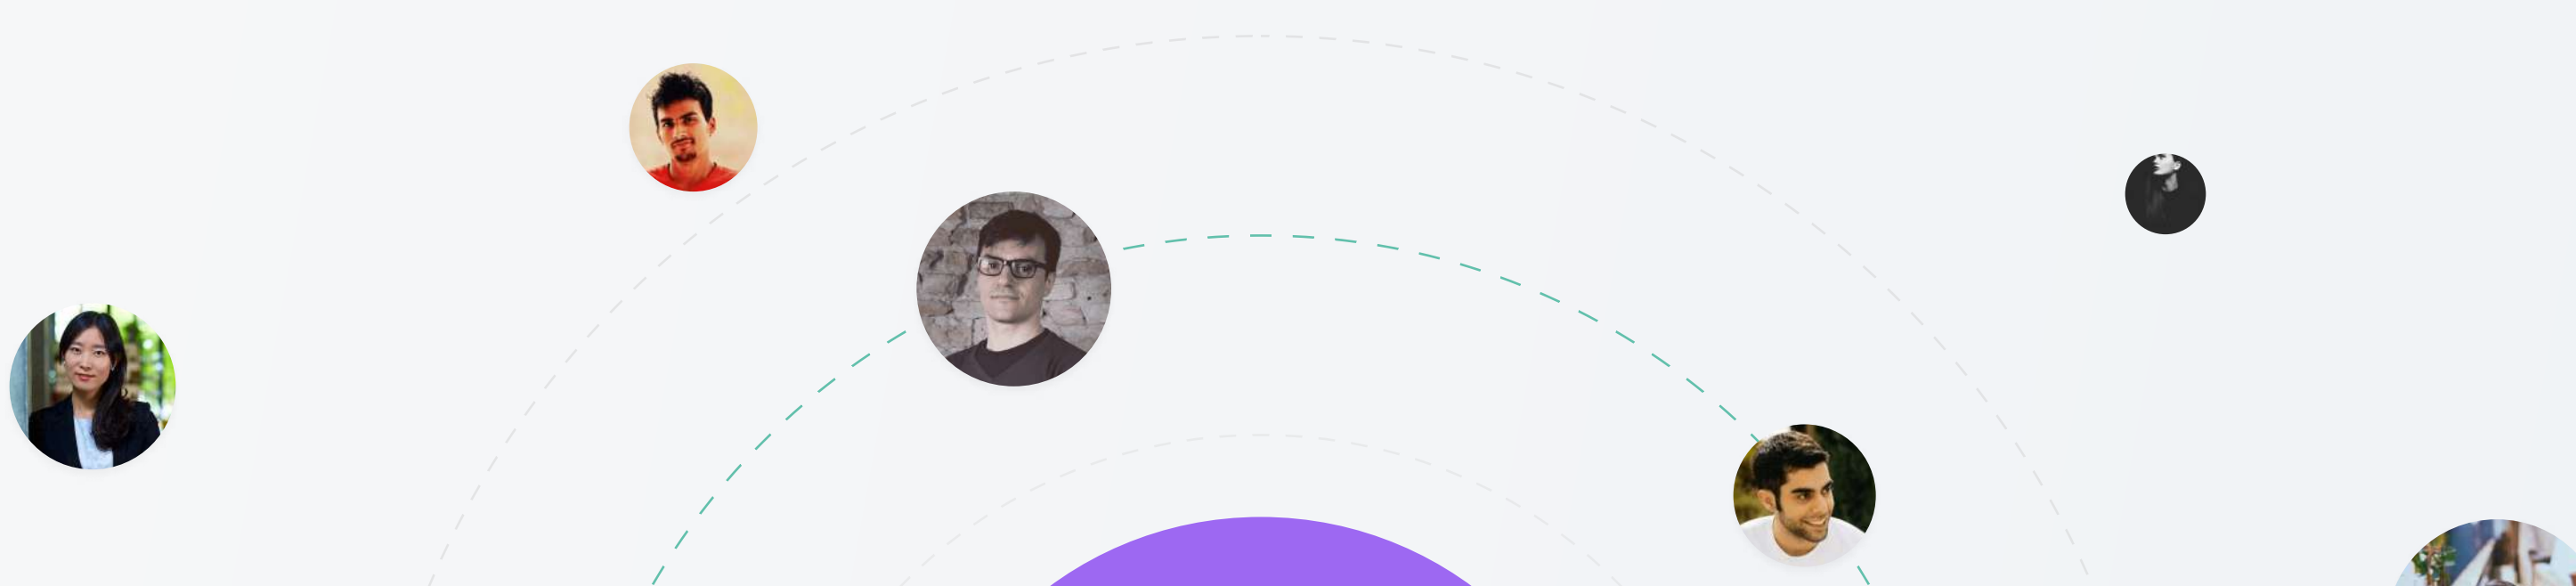

MoDom offers a new online shopping experience.

This is not a simple Internet store, but a guide to the world of original decor and furniture for your home. Professional designers select every product presented on the website.

Client/Target audience

Users who like online shopping

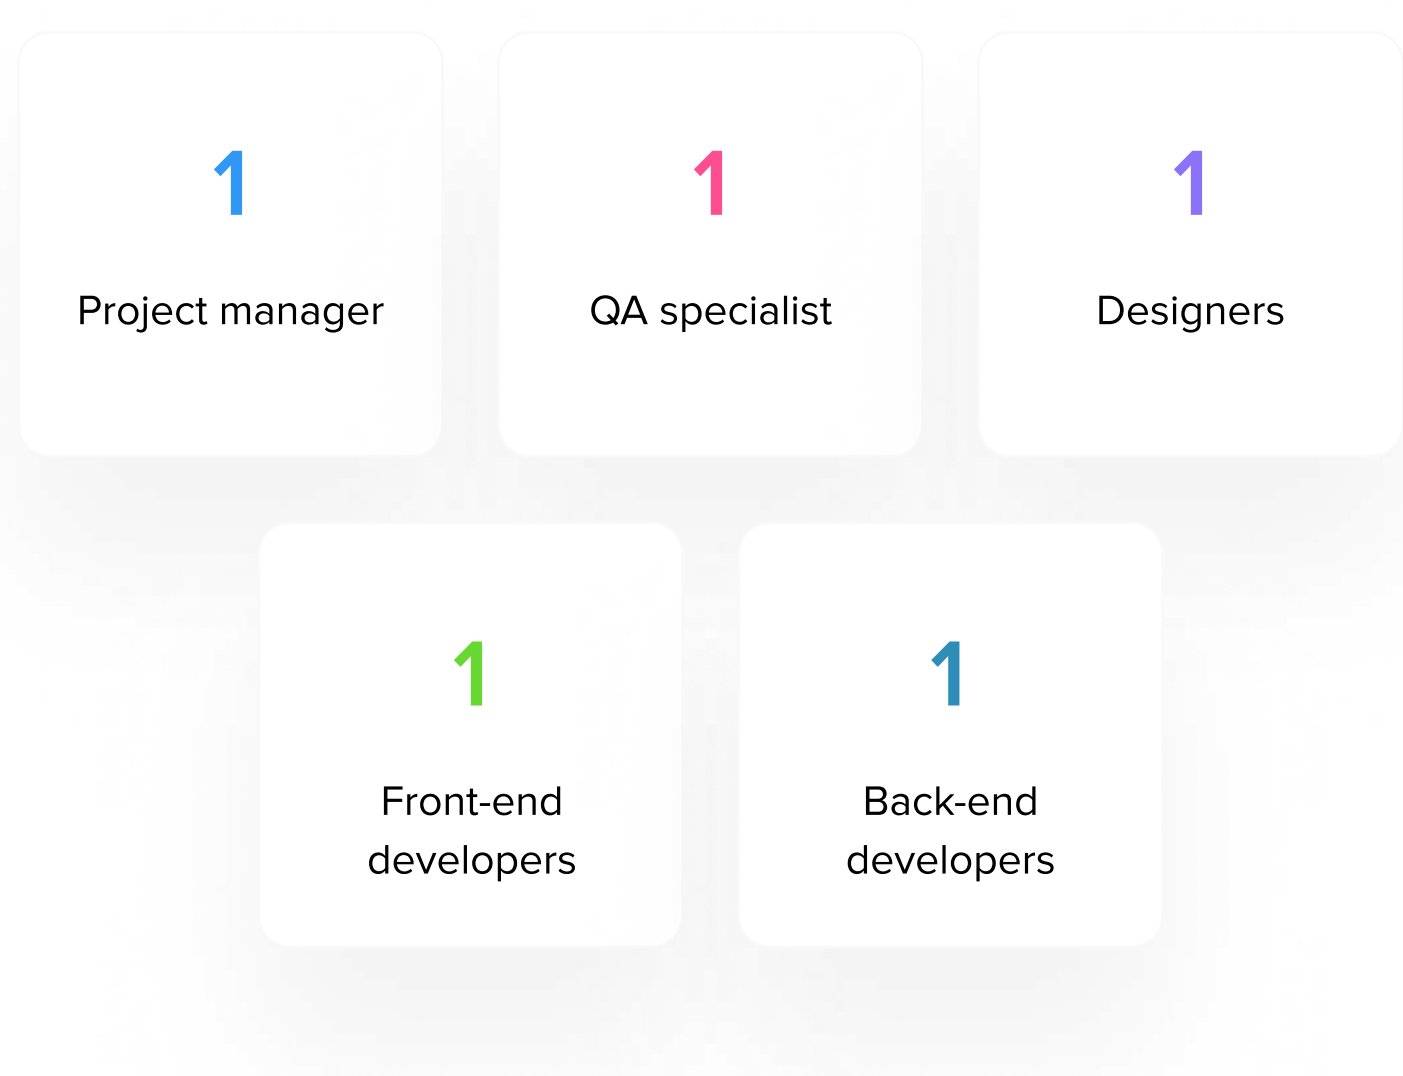

Product overview

You won't find random stuff here! Moreover, fresh interior ideas and individual expert consultations turn the selection process into an exciting activity. Get an expert view of your home's layout and buy everything in one place with MoDom!

Our development team

Thanks to the efficient and well-coordinated work of a small team, the development of telegram bots saves the client's resources significantly.

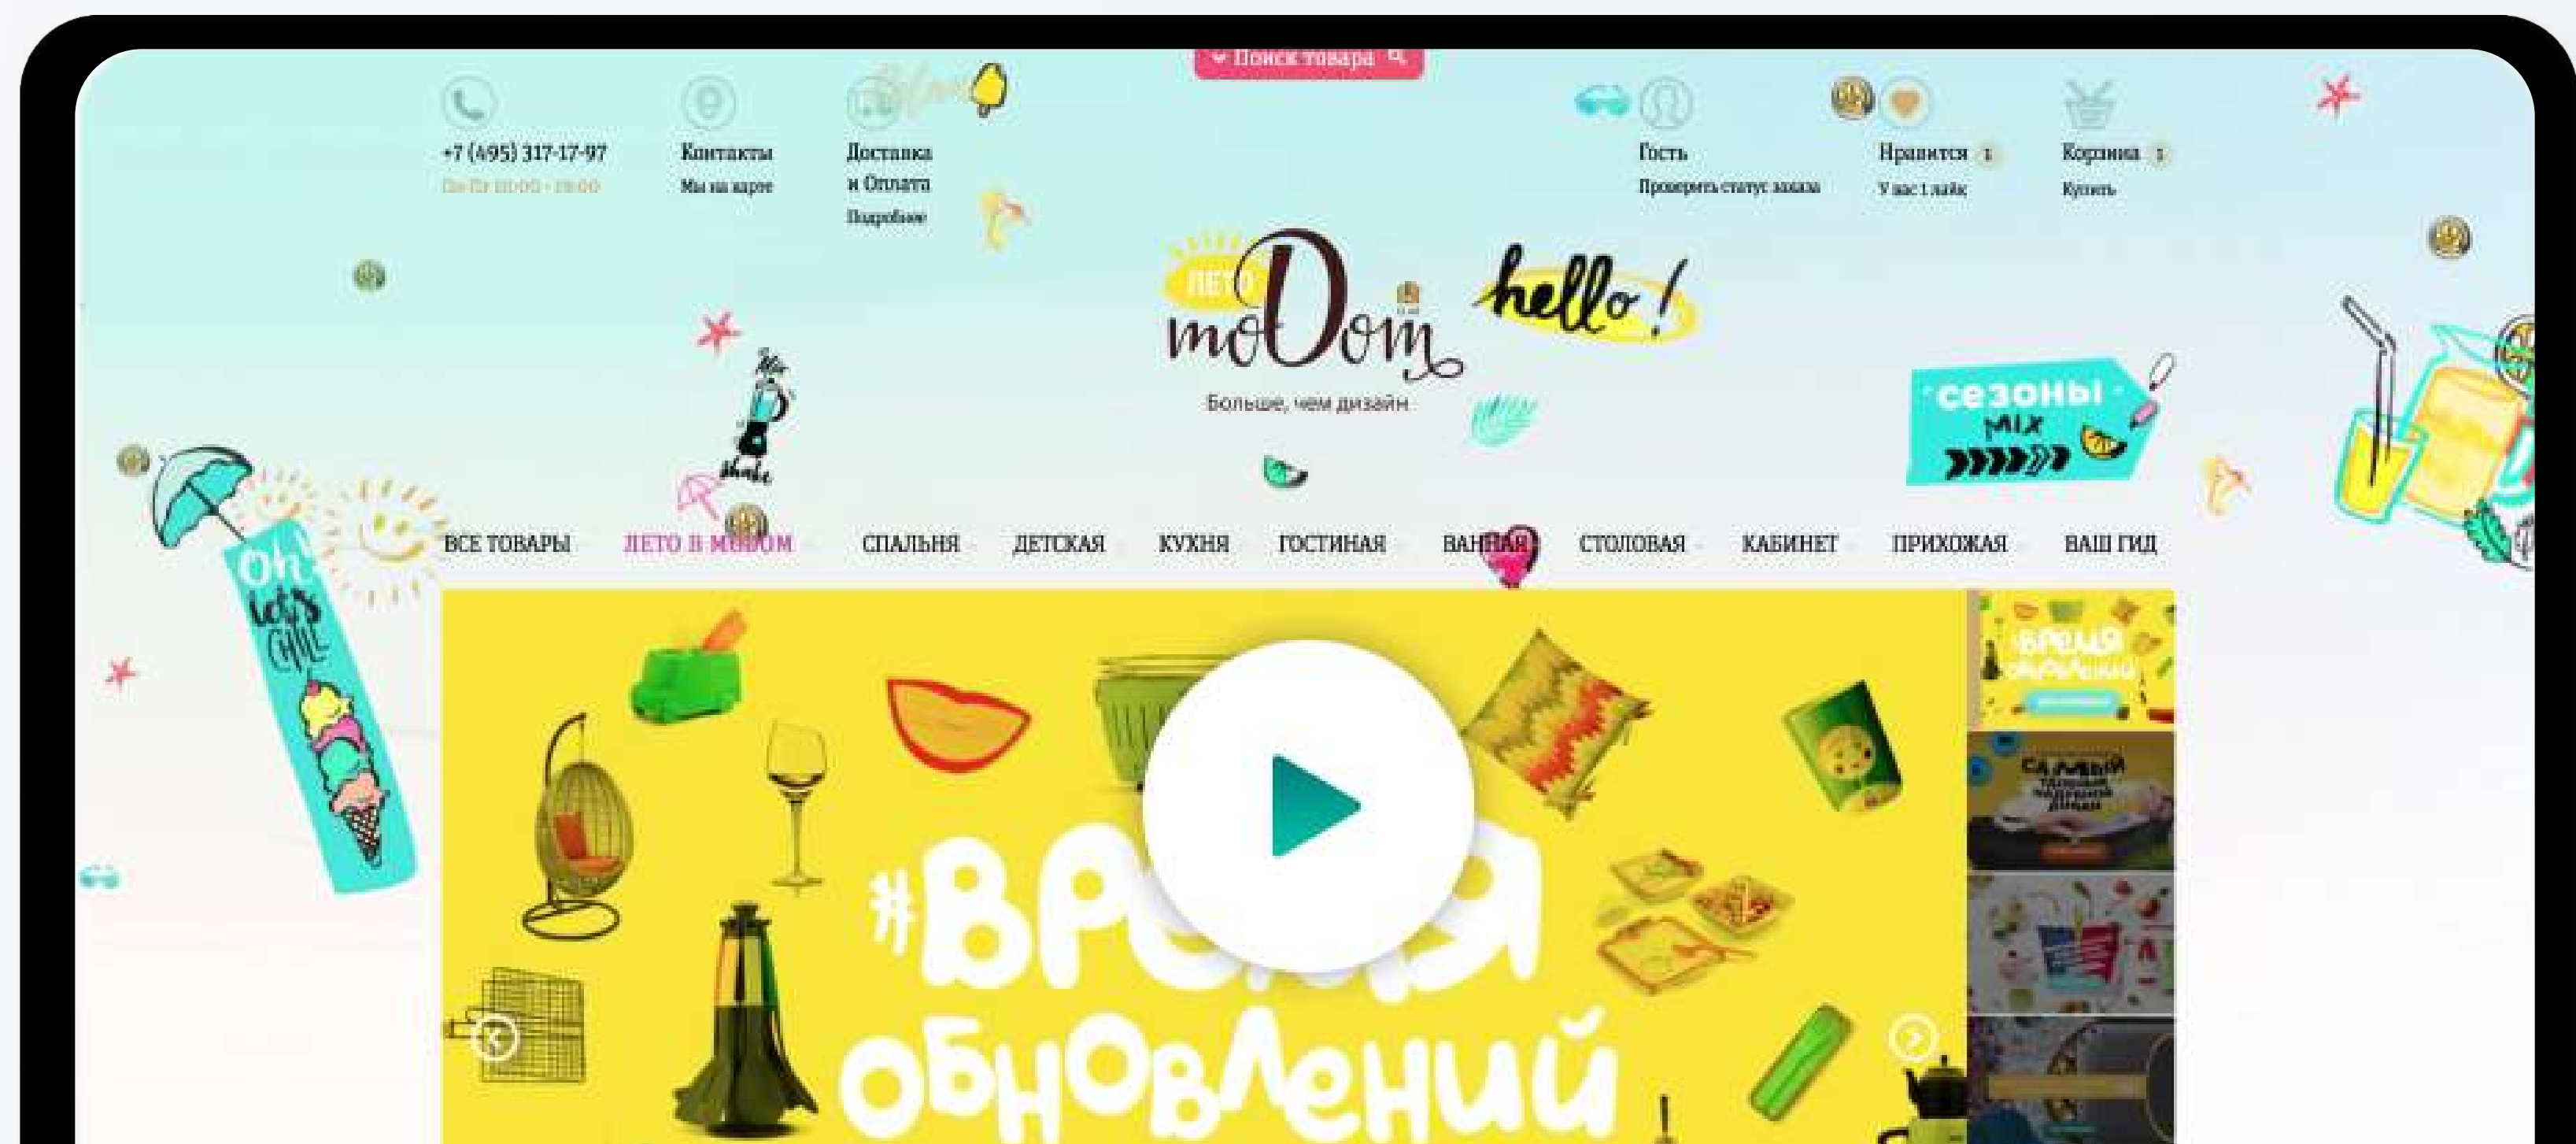

Our approach

- Python**
A class-based, object-oriented programming language that is designed to have as few implementation dependencies as possible.
- Swift**
The global provider of secure financial messaging services.
- React.js**
Open-source, front end, JavaScript library for building user interfaces or UI components.

Solution overview

Owlab helped MoDom to create an innovative commercial experience with automatic analysis of competitor prices and the ability to respond to every client interaction point-by-point.
